No. 5-01

October 24, 2001

Change of Business Filed with CDNX

Trans Asia Resources Inc. is pleased to announce that, during the last six weeks, following the recent shareholder approval of the proposed acquisition of Municipal Software Corporation ("Municipal"), Municipal's sales revenues continue to increase as their products and services continue to enjoy success in the marketplace.

Municipal announced that it has added four new clients over the last month including the City of West Lafayette, Indiana, the City of Grove City, Ohio, the Town of Waterford, Connecticut, and the City of Westford, Massachusetts with contracts totaling over \$480,000. They have all purchased Municipal's CityView local government business process automation software and will be automating a wide range of functions, including building permits, zoning and subdivisions, transportation permits, rental housing and complaint tracking systems and the ability to share information on a jurisdiction-wide basis.

Municipal also announced the appointment of Marshall Vanderburg as a Project Manager and General Manager of its U.S. subsidiary. Marshall has spent the last 15 years working with the City and County of Denver in various capacities, with the last three and a half years being responsible for the implementation of CityView. His knowledge of municipal business process combined with his CityView experience make a welcome addition to Municipal's management team.

The Company is also pleased to announce that the formal filing of the Change of Business following the shareholder approval has now been made with the CDNX.

=====
About Municipal Software Corporation
=====

Municipal Software Corporation is a provider of fully integrated suite of software products that assist municipal administrators and managers with scalable technology solutions for increasing municipal government productivity in order to service citizens and communities more efficiently and effectively. CityView® provides forms automation software combining forms and reports with mapping, Web enablement, and database management, and is used to automate any local government process.

CityView Xpress is designed specifically for out-of-the-box departmental management and comes complete with ready-to-use forms and reports for a variety of municipal functions.
