The City of New Berlin, Wisconsin to upgrade Municipal Software's CityView® System

Municipal Software Corporation, a leading developer of local government business process automation software and a wholly owned subsidiary of Municipal Solutions Group, Inc. (CDNX: MSM), announced today that the City of New Berlin, WI has upgraded their CityView® system to CityView Enterprise.

In January 2001, the City of New Berlin purchased and implemented Municipal Software's "best practices" modules for building permitting and inspections and planning along with CityView Xpress licenses. In January 2002, the City made the decision to upgrade to CityView Enterprise licensing – allowing them to link to GIS data, customize all forms and reports and deploy business processes to the Web when ready.

CityView Xpress licensing is a scaled back version of CityView Enterprise. It limits certain functionality, but can be acquired at a lower cost.

Rob Bennett, President of Municipal Software commented, "It is great to see the City of New Berlin upgrade to CityView Enterprise. This is a real vote of confidence in CityView and Municipal Software. We look forward to New Berlin expanding their use of CityView through their future integration with GIS and the Web."
