MUNICIPAL SOFTWARE CORPORATION EXPANDS U.S. OPERATIONS

VICTORIA—Municipal Software Corporation, a leading developer of local government business process automation software and a wholly owned subsidiary of Municipal Solutions Group, Inc. (CDNX: MSM) is pleased to announce the opening of four new offices in the United States. New offices in Chicago, Los Angeles, Atlanta and Denver ensure that Municipal Software Corporation better serves the American marketplace.

Rob Bennett, President of Municipal Software said today, “We are pleased to be able to increase our presence in the U.S. This is something we have wanted to do for a long time. We were awarded our first U.S. contract in 1998 and now with over 40 installations in 28 different states, it is important to take this next step. The office locations were chosen to be near our customer base to increase service and response time for requests. This is a move that makes perfect sense for us because we already do over 80% of our business in the USA.”

Scott Owen becomes the new sales representative in the Southeast, Kevin Vincent is the sales representative for the West and Bob Carlson covers the Mid-West. Steve Favalaro continues to serve Eastern Canada and the Northeast U.S. from Toronto. Finally, Marshall Vanderburg heads the Denver office that will house an expansion of Municipal Software’s client services team. This office helps the company respond quickly to client requests for training and implementation services.

Municipal Software Corporation (www.MunicipalSoftware.com) provides a fully integrated suite of software products that assist municipal administrators and managers with scalable technology solutions for increasing municipal government productivity in order to service citizens and communities more efficiently and effectively. CityView 8.NET™ provides forms automation software combining forms and reports with mapping, Web enablement, and database management, and is used to automate any local government process. CityView® Xpress is designed specifically for out-of-the-box departmental management and comes complete with ready-to-use forms and reports for a variety of municipal functions.
