Huntington Beach California to Implement Municipal Software's CityView 8.NET® System

Municipal Software Corporation, a leading developer of local government business process automation software, announced today that the City of Huntington Beach, CA has purchased CityView® to automate their Building Permitting and Inspections, Code Enforcement, Plan Checks, Planning and Pre-Construction, Business Licensing, Public Works and Fire Permitting processes. The project is to be implemented in 4 phases over the course of the coming year and it is valued at about \$327,000 US.

The comprehensive and integrated system will provide the City with the ability to automate the wide range of functions listed above and share the information out to contractors, citizens and other interested parties using CityView 8.NET's Web deployment capability.

The City will be using MS SQL Server on the backend and intends to use CityView to share information over the Web – both internally and externally. Each phase of development will include a Web deployment capability. The City also plans to use CityView 8.NET's Web deployment capability to automate field data collection using wireless devices to connect to the Internet and retrieve and enter data. Huntington Beach will also be integrating all its business processes with its ESRI GIS data.

Huntington Beach is located on the shore of the Pacific Ocean in northwestern Orange County. Los Angeles is located 35 miles to the northwest and San Diego is 95 miles to the southeast. With a population of about 200,000, Huntington Beach is the third largest city in Orange County, the 11th largest city in California and the 92nd largest city in the United States. It has the fortune to be the recipient of several #1 rankings:

- "Safest City" in America among the 100 largest cities -- Morgan Quitno Press
- "#1 in Personal Income" among the 100 largest cities -- Governing Magazine
- "#1 Place to raise children" -- Zero Population Growth International
- "#1 City for business in California" -- California Business Magazine

Rob Bennett, President of Municipal Software commented, "Winning the City of Huntington Beach as a client is very exciting for us for several reasons. First, the scope of the project will make the City one of our true corporate solutions and one of our most important reference clients. Second, their planned extensive use of the Internet for internal and citizen use will lead the way for other CityView clients in California and the rest of the country. Third, the value of the project is one of the bigger ones the Company has realized. We are looking forward to a successful implementation and the deployment of CityView's E-government capabilities."
