Municipal Software Corporation and Pen Systems Form Partnership

VICTORIA—Municipal Software Corporation, a leading developer of local government business process automation software and a wholly owned subsidiary of Municipal Solutions Group, Inc. (TSX: MSM), announced today that it has embarked on a partnership with Ontario's Pen Systems in order to provide customers with a field data collection software for building inspectors.

The joint offering of Pen Systems' Inspector+ and Municipal Software Corporation's CityView software products provides a complete field data collection solution which offers considerable benefits to a city: complete digital data capture once at source, lowered costs, increased services and most importantly the ability to operate on-site without an active wireless connection.

Nigel Leith, Technical Director of Pen Systems commented, "Our partnership with Municipal Software Corporation will allow CityView and Inspector+ customers to reach new levels in the provision of municipal services. With our remote field solution integrated with CityView, municipal workers will be liberated from their desks, increasing the efficiency and the quality of city-wide services."

Municipal Software Corporation offers CityView, a suite of enterprise-wide software solutions that automates any government business process such as building and permitting, public works, planning, property management, licensing and code enforcement.

Rob Bennett, President of Municipal Software commented, "We look forward to our partnership with Pen Systems. We believe that the field data collection tools that Pen Systems offers greatly complement our own software and that there is a definite synergy between our two companies. We are confident that this will be a mutually beneficial and long-lasting business relationship."

Pen Systems develops pen-based software that is specifically designed to make field data capture quick and efficient, as well as error-free and transportable. Their Inspector+ product works on a full spectrum of mobile computers from hand-held, table size pen computers to Palms and PDAs. Inspector+ allows inspectors to enter data electronically on a handheld device and then add that data back to the main database once they return to the office or they can remotely transmit the data to their main database.

Pen Systems and Municipal Software Corporation will appear at the MISA (Municipal Information Systems Association of Ontario) trade show from June 9-12, 2002 at the Lamplighter Inn in London, Ontario. Please visit www.pensystems.com and www.municipalsoftware.com for more information.

About Municipal Software Corporation

Municipal Software Corporation (www.MunicipalSoftware.com) was recently awarded one of 15 Government Technology Conference (GTC) Best Solutions Awards at the GTC West trade show in Sacramento, California. Best Solutions are exhibitor awards presented at the GTC to companies that develop a solution for a specific customer to help solve a particular problem. The solution must have resulted in significant benefits. It must have saved time, money or headaches and is worthy of recognition.

Municipal Software Corporation provides CityView®, a fully integrated suite of software products that assist municipal administrators and managers with scalable technology solutions for increasing municipal

government productivity in order to service citizens and communities more efficiently and effectively. CityView 8.NET™ is powerful automation software that is designed specifically for local government and easily converts paper systems and business processes into a computerized system without costly and time-consuming programming. CityView 8.NET enables E-government. It allows government to automate any business process internally and offer it over an Intranet or the Web with the click of a button. CityView Xpress is designed specifically for out-of-the-box departmental management and comes complete with ready-to-use forms and reports for a variety of municipal functions.

About Municipal Solutions Group Inc.

Municipal Solutions Group Inc. (www.MunicipalSolutionsInc.com) was formed in January 2002 as the public financing arm for Municipal Software Corporation, to provide the overall strategic leadership and guidance for Municipal Software and to build comprehensive solutions for local government on a global basis.

Forward-Looking Statements

Certain statements in this news release are not historical and may constitute forward-looking statements reflecting Municipal Solutions Group Inc.'s current expectation in the local government sector. Investors are cautioned that all forward-looking statements involve certain risks and uncertainties, including, without limitation, changes in market and competition, technological and competitive developments, cooperation and performance of strategic partners, and potential downturns in economic conditions generally. Forward-looking statements are based upon management's estimates, beliefs, and opinions on the date the statements are made. Municipal Solutions Group Inc. assumes no obligation to update forward-looking statements if circumstances of management's estimates, beliefs, or opinions should change. Additional information on these and other potential factors that could affect the Company's financial results are detailed in documents filed from time to time with the British Columbia Securities Commission. The TSX Venture Exchange (formerly CDNX) has not reviewed and does not accept responsibility for the adequacy or accuracy of this release.
