Executive Director of Center for Digital Government Speaks at CityView User Conference

Victoria, British Columbia, October 7, 2003 - Municipal Software Corporation, a leading developer of local government business process automation software and a wholly owned subsidiary of Municipal Solutions Group, Inc. (TSX-V:MSM), is proud to announce that Cathilea Robinett, Executive Director of the Center for Digital Government is the Keynote Speaker at the 10th Annual CityView User Conference on November 5th at the Holiday Inn on King in Toronto, Ontario.

For over a decade, Ms. Robinett has served as a thought leader and adviser to industry, government and education officials, helping them develop sound strategies for the Digital Age. She will address issues of concern to local government administrators, including the importance of using technology to manage Homeland Security concerns. The Center for Digital Government is an international research and advisory institute providing industry, government, and education leaders with decision support, research and services to help them effectively incorporate new technologies in the 21st century. The Center offers an array of unique market intelligence programs, projects, and publications covering the critical policy, executive leadership and technology applications surrounding electronic government.

The CityView User Conference, held from November 5-7th, with its “Integrating the Enterprise” theme, will address issues specific to CityView users and to broader local government stakeholders, including homeland security, disaster management and the looming retirement crisis and its impact on enterprise management in local government. The CityView User Conference also includes presentations by industry experts from Microsoft, Acer and ICMA, as well as staff presentations and client showcases from CityView clients such as the City of Ontario, CA, the City of Keene, NH, the District of Langford, BC, the City of Huntington Beach, CA and the Town of Aurora, ON.

Troy Kusy, Vice President of Major Accounts for Municipal Software, says that the “Integrating the Enterprise” theme is of vital importance to local government at this time, “we want to emphasize that while the term ‘Enterprise’ may seem very vogue right now, it really is more than just a trend and that the concept of true Enterprise integration is everlasting and is also the reality of what is required to build a truly responsive government today. Using CityView and Municipal Software services we want to show clients how they can approach Enterprise one step at a time without biting off more than they can chew. After all, CityView really *is* Enterprise.”

Kusy also says that from the client’s perspective, “one of the most beneficial aspects of the CityView User Conference is the information-sharing that occurs between clients.” Sue Leuchter, Municipal Software Program Manager adds that “clients get to see how other clients are using our software to automate and streamline their businesses and then they may go home with new insights and ideas on how their own processes can be improved using CityView.”

-30-

CityView 8.NET Enterprise is a true enterprise solution that integrates functions across an organization, enables e-government and provides a foundation for Homeland Security initiatives. CityView 8.NET helps government automate business processes such as Building, Planning, Code Enforcement, Business Licensing, Public Works, Emergency Management and more. Award-winning CityView integrates with existing systems, including financials, other departmental automation software, document management, IVR, cashiering, field data collection and GIS. With clients in 30 states and five provinces, and in business for over 20 years, Municipal Software Corporation is the one-stop provider of everything government needs for an enterprise solution, including the software, the training, the services and the post-purchase support. Perhaps most importantly, CityView allows local governments to build their enterprise systems one application at a time, without breaking their budget.

About Municipal Software Corporation

Municipal Software Corporation (www.MunicipalSoftware.com) is the 2002 gold medal worldwide winner in the Packaged Application Category for the Microsoft Certified Partner Awards. The company provides CityView 8.NET, a true enterprise solution that integrates functions across an organization and enables e-government.

CityView 8.NET Enterprise incorporates Microsoft's .net technology. The incorporation of Microsoft's .net technology allows CityView to take any form and report and save it as an .ASPX page that maintains the full functionality of the desktop form and allows it to be accessed through the Web. The .net technology allows Municipal Software Corporation to provide their users with a fully functional browser interface. CityView 8.NET Enterprise also incorporates ESRI's MapObjects to allow direct links to mapping data so users can deploy maps with their Web forms and reports by using ESRI's ArcIMS. CityView 8.NET Enterprise automatically completes the entire configuration necessary to make this work.

About Municipal Solutions Group Inc.

Municipal Solutions Group Inc. (www.municipalsolutionsinc.com) was formed in January 2002 as the public financing arm for Municipal Software Corporation, to provide the overall strategic leadership and guidance for Municipal Software and to build comprehensive solutions for local government on a global basis.
