FOR IMMEDIATE RELEASE

TSX Venture Exchange Symbol: MSM

San Mateo joins a growing list of prominent CityView clients in California

Victoria, British Columbia, February 9, 2004 – Municipal Software Corporation, the developer of CityView, local government business process automation software, and a wholly owned subsidiary of Municipal Solutions Group, Inc. (TSX-V:MSM), is proud to announce that the City of San Mateo, CA has purchased CityView to automate Permitting and Inspections, Planning, Licensing, Fire Permits, Public Works Permits and Code Enforcement.

CityView will be integrated with several of the city's key existing systems including their financial software, an IVR (integrated voice response) system and their GIS data. While the city's main focus is automating internal systems, they also intend to offer services on-line to their customers for permitting, inspections, and complaint tracking and to have their inspectors use CityView on pen tablets out in the field.

According to Municipal Software Corporation President and CEO Robert Bennett, "Being selected for this project, after a highly competitive RFP process with an extensive process of due diligence on San Mateo's part, helps to demonstrate that CityView is the best enterprise solution available for meeting the needs of large local government organizations." CityView is used across the USA and Canada by over 150 clients in 30 states and five provinces. San Mateo, CA joins other large jurisdictions such as the City and County of Denver, CO and the City of Charlotte, NC.

"We are pleased to welcome such a professional and prominent client in Northern California. The entire selection process was one of the most organized that we've seen to date, and we are quite excited about what will result from our collaboration," said Bennett.

CityView Enterprise helps government automate business processes such as Building, Planning, Code Enforcement, Business Licensing, Public Works, Emergency Management and more. It is open and flexible enough to fit with any business process. Unlike other similar products, CityView is not just forms automation software; it is an application development tool, which means that the forms, reports and workflow that are specific to each client are found in the application development layer of the software, not in the source code. Clients can modify their own systems as they see fit, and new software releases do not affect the client's unique configurations.

The City of San Mateo is located just south of the San Francisco airport in Northern California with a population of about 100,000 and is known as one of the leading edge municipalities in Northern California.

CityView Enterprise is a true enterprise solution that integrates functions across an organization, enables e-government and provides a foundation for Homeland Security initiatives. CityView Enterprise helps government automate business processes such as Building, Planning, Code Enforcement, Business Licensing, Public Works, Emergency Management and more. Award-winning CityView integrates with existing systems, including financials, other departmental automation software, document management, IVR, cashiering, field data collection and GIS. With clients in 30 states and five provinces, and in business for over 20 years, Municipal Software Corporation is the one-stop provider of everything government needs for an enterprise solution, including the software, the training, the services and the post-purchase support. Perhaps most importantly, CityView allows local governments to build their enterprise systems one application at a time, without breaking their budget.

About Municipal Software Corporation

Municipal Software Corporation (www.MunicipalSoftware.com) is the 2002 gold medal worldwide winner in the Packaged Application Category for the Microsoft Certified Partner Awards. The company provides CityView Enterprise, a true enterprise solution that integrates functions across an organization and enables e-government.

CityView Enterprise incorporates Microsoft's .net technology. The incorporation of Microsoft's .net technology allows CityView to take any form and report and save it as an .ASPX page that maintains the full functionality of the desktop form and allows it to be accessed through the Web. The .net technology allows Municipal Software Corporation to provide their users with a fully functional browser interface. CityView Enterprise also incorporates ESRI's MapObjects to allow direct links to mapping data so users can deploy maps with their Web forms and reports by using ESRI's ArcIMS. CityView Enterprise automatically completes the entire configuration necessary to make this work.

About Municipal Solutions Group Inc.

Municipal Solutions Group Inc. (www.MunicipalSolutionsInc.com) in January 2002 as the public financing arm for Municipal Software Corporation, to provide the overall strategic leadership and guidance for Municipal Software and to build comprehensive solutions for local government on a global basis.
