## **Town of Darien selects CityView solution from Municipal Software**

**Victoria, British Columbia, May 20, 2005**—Municipal Software (TSX-V:MSZ) is pleased to announce that the Town of Darien, Connecticut has purchased its CityView product solution to provide an Integrated Permit Tracking System. According to Darien’s Town Administrator John Crary, “CityView will coordinate the efforts of five Town departments to manage all land use planning, permitting and enforcement activities.”

As John Crary added “the Town’s goal was to acquire an “off-the-shelf” integrated software solution that is also capable of utilizing existing databases in other departments and integrating with both CAMA and GIS systems. CityView was the unanimous choice by our selection committee to meet this goal. Once CityView has streamlined our internal process we hope to offer on-line services to our constituents to provide even better customer service to them.”

The Town of Darien elected to use the CityView application in use at the Town of Waterford, CT to automate their Planning, Permitting, Code Enforcement and Conservation processes. According to Jeremy Ginsberg, Director of Planning and Zoning, “Our selection committee had very specific needs that we were looking for in our software selection. We were looking for a proven application that could be tailored to meet our needs and that we could configure in the future as our needs change. We found this in working with the Town of Waterford to utilize their application and using the CityView Application Builder to adapt it to our needs as they change.” By using a prebuilt application from the Town of Waterford, Darien will spend less time and money implementing the system.

Iain McLean, Chief Executive Officer for Municipal Software commented, “We are delighted to partner with the Town of Darien on this project. Their decision shows the versatility of the CityView platform. We can draw on specific experience with a neighboring municipality to address the needs of a growing community and we know that the citizens of Darien can look forward to improved services and access as a result.”

Jeremy Ginsberg concluded by remarking, “We believe that by using the Town of Waterford’s application, the overall implementation and costs will fall within our budget and we will quickly begin realizing the benefits of our investment. Municipal Software brings a lot of experience in local government to their solution.”

### **About the Town of Darien**

Incorporated in 1820, the Town of Darien, CT (population 19,607) is located in South Western Connecticut and is mainly a residential community with no industry but with an active town center, excellent schools, and involved residents. It offers unspoiled land and clear waters. Darien’s excellent public school system, shoreline location and proximity to New York City make the town an attractive place to call home.

### **About Municipal Software Corporation**

# Municipal Software

Municipal Software Corporation (TSX-V:MSZ) provides easily installed, packaged software solutions that manage the everyday business processes of local governments. The solutions are based on 23 years of experience with a product platform that easily adapts to the changing practices of clients. Branded under the CityView name the company provides a number of out of the box solutions automating practices in Property Information, Permits and Inspections, Planning, Code Enforcement, Business Licensing and Cashiering. CityView Application Builder is a set of application development tools that allows the client to develop unique applications to match specific needs. Municipal Software offers a complete range of services from training and customer support of its suite of products to custom development for unique applications.
