CENTRE REGION CODE ADMINISTRATION EXPANDS THEIR USE OF MUNICIPAL SOFTWARE'S SOLUTIONS TO IMPROVE THE BUSINESS PROCESSES OF NEIGHBOURING JURISDICTIONS

Victoria, British Columbia, December 20, 2006 - Municipal Software (TSX-V:MSZ) announced today that the Centre Region Code Administration (CRCA), PA has decided to extend their usage of CityView to CityView Prebuilts™ for many processes in the six jurisdictions under the Centre Region Council of Governments. Centre Region has purchased the entire suite of CityView Prebuilts, including Property Information, Permits & Inspections, Planning, Code Enforcement, Licensing and Cashiering as well as the related implementation and training services.

“CRCA has been working with Municipal Software since 1997, and have been very pleased with their software and the quality of service that they have provided”, said Greg Mussi, Director for the CRCA. “This project allows us to streamline business processes amongst our jurisdictions while leveraging our existing technology investment to provide a cost-effective and efficient solution”. He added: “In particular, the similarities with our existing system ensure a reduced learning curve for our staff”.

By selecting CityView, the Centre Region reaffirms its commitment to provide better service to the public: citizens will be able to access real-time information on their permit status or schedule inspections 24/7, via the Internet. CRCA will also be using CityView to improve efficiencies in the area of rental housing by automating licensing and code enforcement of rental properties.

Iain McLean, CEO of Municipal Software, commented: “The Centre Region decision reflects CityView’s flexibility, and its ability to address the changing needs of local governments. We look forward to continuing this successful partnership with the Centre Region.”

About Centre Region Code Administration

The mission of the Centre Region Code Administration (CRCA) Agency is to promote, provide and ensure the health, safety and welfare of all people working and residing in the participating municipalities of College, Ferguson, Harris, Halfmoon, Patton Townships and State College Borough. Code Enforcement plays an important role in the community, not only with regard to new construction, but also with the repair and alteration of existing buildings. Because the building industry is ever changing, code enforcement personnel must stay informed regarding new materials, processes and practices. By keeping up with the industry, the department exerts a positive influence on the environment and contributes to the economic health and well being of the community.

About Municipal Software Corporation

Municipal Software Corporation (TSX-V:MSZ) provides easily installed, packaged software solutions that manage the everyday business processes of local governments. The solutions are based on 24 years of experience with a product platform that easily adapts to the changing practices of clients. Branded under the CityView name, the company provides a number of out of the box solutions automating practices in Property Information, Permits and Inspections, Planning, Code Enforcement, Licensing and Cashiering. CityView Application Builder is a set of application development tools that allows the client to develop unique applications to match specific needs. Municipal Software offers a complete range of services from training and customer support of its suite of products to custom development for unique applications.
