CITYVIEW™ CODE ENFORCEMENT PREBUILT™ TO AUTOMATE VILLAGE OF PLAINFIELD, IL'S POLICE DEPARTMENT

Victoria, B.C., April 13, 2006 — Municipal Software (TSX-V:MSZ) is pleased to announce that on March 31, the Village of Plainfield, IL, chose the CityView Code Enforcement PreBuilt to automate its police department activities and to provide the first step towards web-based, interactive-services for its citizens. The Village will also use the CityView Application Builder tools to create an integrated system for managing Public Works.

“We needed to replace our existing system. Rapid growth over recent years has placed increasing demands on the Village. The CityView solution provided us with an integrated vision that will enable us to provide improved service to our community,” said Don Bennett, Chief of Police.

Together with the Code Enforcement PreBuilt, the CityView Application Builder will provide a one-stop solution for all public service requests. “The implementation of CityView will increase the efficiency and improve the workflow between Public Works Divisions and all Village Departments,” said Allen Persons, Director of Public Works.

Chris Minick, Village Administrator said, “We see excellent value in the combination of the out-the-box, quickly-installed PreBUILTs and flexibility in the development tools provided by CityView Application Builder. We will be able to add new automated processes easily and customize them to reflect our business practices.”

Iain McLean, Chief Executive Officer for Municipal Software, commented, “We are looking forward to working with the Village of Plainfield to automate their code enforcement processes. We are confident that both citizens and staff will benefit from improved services as a result of the purchase. This is the third successful sale of PreBuilt solutions this year and, taken together with three clients having ‘gone live’ during the First Quarter of 2006, it marks further demonstration of the progress that Municipal Software is making.”

About the Village of Plainfield

Situated on the banks of the DuPage River, Plainfield is the oldest community in Will County, IL and one of the fastest growing communities in the state. It has grown from a rural community in the 1960s to a modern suburb in the Chicago metropolitan area. Last year alone the Village added 1,407 homes and 800,000 feet of office, commercial and industrial space. The Village of Plainfield is home to just over 30,000 residents.

About Municipal Software Corporation

Municipal Software Corporation (TSX-V:MSZ) provides easily installed, packaged software solutions that manage the everyday business processes of local governments. The solutions are based on 24 years of experience with a product platform that easily adapts to the changing practices of clients. Branded under the CityView name, the company provides a number of out of the box solutions automating practices in Property Information, Permits and Inspections, Planning, Code Enforcement, Licensing and Cashiering. CityView Application Builder is a set of application development tools that allows the client to develop unique applications to match specific needs. Municipal Software offers a complete range of services from training and customer support of its suite of products to custom development for unique applications.
