## **MUNICIPAL SOFTWARE'S CITYVIEW™ PREBUILTS TO STREAMLINE PERMITTING PROCESSES AT THE TOWN OF GREENWICH, CT**

**Victoria, BC, August 20, 2007** – Municipal Software (TSX-V:MSZ) announced today that it has been selected by the Town of Greenwich to implement an integrated permit tracking system. Municipal Software will provide the complete suite of CityView PreBuilds – Property, Planning, Permitting and Inspections, Code Enforcement, Licensing and Cashiering – to the Town as well as the CityView Public Portal. Municipal Software will also provide all related implementation services, including project management, and training.

Greenwich's permitting process relies on the coordinated efforts of nine departments who currently record and track information related to planning, permitting and code enforcement activities using disparate systems. With CityView, these departments will have access to all application and permit information in a shared, central database, eliminating duplication of effort, reducing permit processing and approval times, and providing management with accurate, reliable information to direct the departments' activities.

Constituents benefit from the new functionality with direct access to Building Development information and services, including online applications and status reporting, and by phone through an automated telephone information system that integrates with CityView.

“We are confident that CityView will provide us with a number of time-saving efficiencies allowing us to reduce the permit processing time and ensuring that we continue to meet our commitment to provide our constituents with excellent service,” said Boris Hutorin, IT Director, Town of Greenwich. “Further, the CityView Application Builder allows us to mould the product to meet our future growth and expansion needs, so that we are able to meet this commitment in the long-term.”

# Municipal Software

Iain McLean, CEO of Municipal Software said, “The Town of Greenwich is the seventh jurisdiction in the state to choose CityView to address their constituents’ demand for increased levels of service. We are pleased to welcome them to the CityView community and look forward to building on past successes in the region.”

## **About Greenwich, CT**

Located on Long Island Sound just thirty miles east of New York City, Greenwich is recognized as a premier residential community. Recently it was ranked by the Robb Report, a magazine focused on the needs of the ultra-affluent, as the top place to live in North America. With a median home price of approximately \$1,500,000 and an average price of approximately \$2,000,000, the total market value of Greenwich’s real estate, \$46 billion, is the highest in Connecticut. Greenwich has a population of 63,000 and is home to the headquarters of a dozen of the largest corporations in Connecticut.

## **About Municipal Software Corporation**

Municipal Software Corporation (TSX-V:MSZ) provides easily installed, packaged software solutions that manage the everyday business processes of local governments. The solutions are based on 25 years of experience with a product platform that easily adapts to the changing practices of clients. Branded under the CityView name, the company provides a number of out of the box solutions automating practices in Property Information, Permits and Inspections, Planning, Code Enforcement, Licensing and Cashiering. CityView Application Builder is a set of application development tools that allows the client to develop unique applications to match specific needs. The company recently launched web based services under the Local Government Manager <sup>TM</sup> name (available through the Application Exchange of Salesforce.com) for jurisdictions looking for the convenience and cost effectiveness of a hosted product application. Municipal Software offers a complete range of services from training and customer support of its suite of products to custom development for unique applications.
