

At Municipal Software we understand you need a software solution that provides value immediately, and you don't have extra people to implement an Enterprise System. Packed with the forms, reports and automation you need, CityView Xpress helps you improve efficiency, deliver better service and accountability for your Community Development Department.

Based on over 28 years of experience, and the best practices of over 125 customers CityView Xpress provides all the automation you need to manage Property Information, Permits & Inspections, Planning, and Code Enforcement services.

CityView Xpress

- Packed with intuitive forms, reports and automation to make your job easier
- Pre-configured workflow and business rules to streamline your processes and improve customer service
- Out of the box reports to meet your reporting needs
- Use wherever you work - in the office, in the field and on the web
- CityView Xpress mapping leverages your investment in GIS

Property Information:

CityView Xpress Property Information provides you with a powerful inventory of your organization's property base to help your department find information quickly. Quickly view all data and land management activities associated with a given parcel.

Permits & Inspections:

Streamline and automate your Building Department's permit approval and issuance process from initial application to Certificate of Occupancy. CityView Xpress Permits & Inspections provides you with an efficient approach to permitting that simplifies and standardizes your workflows.

Planning:

Track and manage all types of planning and development applications from beginning to end, reviewing and meeting mandated milestones along the way. CityView Xpress Planning provides you with powerful data that ensures you always have an answer when someone needs to know what's going on and why.

Code Enforcement:

Track and manage your Code enforcement issues from citizen complaint to case resolution. Created on the principles of priority-based inspector workflow management, CityView Xpress Code Enforcement ensures your department provides consistent, efficient services.

The screenshot displays two overlapping windows from the CityView Xpress application. The top window is titled 'Permit Application' and shows fields for Application # (20070000013), Application Type (Building (Basic)), Work Class (Demolition), Construction Type (SI), Inspector (Andy Burrows), Jurisdiction (U - Utility, miscellaneous), and Occupancy Code (U - Utility, miscellaneous). It also includes a 'Status Tracking' table with columns for Status, Date Entered, and Entered By.

The bottom window is titled 'Case Information' and shows Case Number (CE20070000073), Case Type (Fire and Life Safety), Priority (Routine), Inspector (Susan McCormick), Jurisdiction (Not Applicable), Origin (Complaint), and a Detailed Description (Garbage piled on front lawn and causing risk for children playing in the neighborhood). It also includes a 'Status Tracking' table with columns for Status, Date Entered, Entered By, and Notes.

Why Choose CityView Xpress?

- CityView Xpress is a pre-configured solution based on over 28 years of providing best practice solutions to Local Government for Community Development Departments.
- A successful implementation model ensures you begin realizing value from your investment in as little as 6 weeks.
- Municipal Software is dedicated to providing solutions to local governments without the need for large IT Departments and large budgets.
- Annual Maintenance program provides for support and continuous upgrades for your CityView Xpress Solution ensuring you keep pace with evolving technologies and new functionality.
